

Calls from telemarketers had been relentless, 10 - 15 a day, often the same ones over and over. I consider this an invasion of privacy. I can choose not to open mail but even if I choose not to answer the phone, the telemarketers tie it up. We tried the telezapper; noticed no difference. Got an answering machine; allows screening but does not stop the calls. Even the NJ Do-Not-Call law does not stop them, but it has significantly reduced them. Please do not weigh the "money" of the telemarketers above the private "freedoms" we would all like to enjoy. Thank You.
